

Le Roy HB 6519

Dear Legislators,

It is our right to know what we are eating and feeding our families.

Why is it that corporations continue to have more and more control over our government and the people have less and less control?

Could it be that some of you are in close relationships (perhaps even married to) those in these lobbying positions?

I have a right to make an informed decision and without proper information and full disclosure this is not even a possibility.

So many of us have fallen on hard times these last few years. We are doing the best we can just to make ends meet. Not all of us can afford to buy exclusively organic - which is the only way to ensure we are not getting GMO's. We would ALL like to have the opportunity to make informed choices when it comes to our families. We would ALL like the opportunity to eat healthier and know the cheaper food options we can afford are indeed healthier options.

Do the right thing for once. Support the people, NOT mega corporations like Monsanto!, for a change. Show us that we can have faith in your leadership and that you are really in office FOR THE PEOPLE!

Respectfully submitted,

Roxanne LeRoy
Thomaston, CT
